# Security under *your* Control

[www.scm-concerto.com](http://www.scm-concerto.com)

ConCERTO combines physical & logical access and more ...

## Do you want to

- Improve your access security
- Simplify IT administration for logical and physical convergence
- Render your employees' daily workflow more efficient and convenient
- Reduce IT support costs
- Use only one credential for different applications

... then **ConCERTO is your perfect choice.**

## ConCERTO Key Benefits

- Enhanced security, reduced number of credentials
- Solution out of the box and ready to use
- Intuitive and convenient to use
- Open for adding other applications
- YOUR applications under YOUR control
- Reduced investment and maintenance costs
- Fast return of investment

... all with one secure contactless credential.

## ConCERTO LOGON Starter-Kit

- Get started with logical access today
- Deploy your ConCERTO CARDS for Windows
- Logon and Single Sign-on across your network
- The ConCERTO LOGON Starter-Kit allows you to equip 20 seats in an easy, fast and efficient way

## What is ConCERTO?

- ConCERTO is a secure platform for multiple applications
- Open architecture for adding other services
- One secure credential for all applications

## ConCERTO Elements Flexible, modular & scalable

Various building blocks allow you to flexibly migrate your existing infrastructure to a higher security level.

Start with ConCERTO LOGON for example, then easily add other applications and components at any time.

### ConCERTO CREDENTIAL

Credentials based on DESFire EV1 in multiple form factors

### ConCERTO READER

ConCERTO enabled contactless and dual interface smart card readers

### ConCERTO LOGON

Secure Windows Logon and Single Sign-On made easy and convenient

### ConCERTO ACCESS

ConCERTO enabled secure physical access readers

### ConCERTO PRINTER

Personalize your card in-house with ConCERTO enabled printers

### ConCERTO COMPATIBLE

Various applications and products can be made ConCERTO compatible helping to increase the security of your environment

## Logical Access

*Use the same ConCERTO CREDENTIAL for secure Windows LOGON and Single Sign-On. ConCERTO LOGON is an out of the box, ready to use Windows Add-on.*

## ConCERTO LOGON Solves a critical security issue for you

Securing company data and ensuring privacy is crucial to your business! Often your stringent password, user and workflow policies are unconsciously undermined by your employees. Bad password habits such as writing passwords down, re-using passwords for different applications and choosing simple passwords can make organizations vulnerable to attacks and data theft.

ConCERTO LOGON is a secure solution using a contactless DESFire EV1 technology for Windows LOGON and Single Sign-On. ConCERTO offers:

- Strong two-factor authentication (contactless credential & PIN)
- Support of complex and cryptic passwords
- Secure processing and storage of all logon data
- AES 128 bit data encryption and communication

... ConCERTO LOGON helps you to keep your company data safe.

## Top 10 Features

- 1 End-user self-enrollment capability
- 2 Different card removal behaviors
- 3 Syncs with Active Directory
- 4 Central server based logon data administration
- 5 Various reporting capabilities support security and workflow audits
- 6 Configurable for different user groups and security policies
- 7 Auto record of logon process
- 8 Easy card activation and deactivation
- 9 Easy card replacement process
- 10 Card printer support

## Why is ConCERTO LOGON your ideal choice?

There are different solutions in the market, but ...

- ConCERTO works out of the box as a Windows Add-on
- No changes to existing Windows infrastructure needed
- Low one-time investment per seat
- No annual license fees
- Reduced IT support calls
- Fast return on investment

## Your employees will benefit from

- Not having to remember complex passwords
- Making access to web applications much faster
- "Auto-record" and "auto-fill" of website and application logon information
- Intuitive and easy to use user-interface
- One credential for many applications

## Physical Access

Use *YOUR* secure contactless ConCERTO CREDENTIAL for secure and convenient access to your company premises such as parking lots, office building and secure areas.

## Physical Access Control

Use your secure contactless ConCERTO CREDENTIAL for physical access to your company's premises and offices. There are several ways to integrate your ConCERTO CREDENTIAL into 13.56 MHz HF access infrastructure.

- Use the full authentication capabilities of your ConCERTO CREDENTIAL with a ConCERTO ACCESS reader
- Add your own physical access application to your ConCERTO CREDENTIAL
- Use the legacy path leveraging the ConCERTO CREDENTIALS' 7 byte UID (unique serial number)

ConCERTO's flexible and open structure makes it easy to adapt it to your needs.

## Other Services

Other services such as access to printers, secure disk encryption and canteen payment can be added to your secure ConCERTO CREDENTIAL in an open and easy manner.

## Access to additional services

Our contactless ConCERTO CREDENTIAL is also capable of adding additional applications to enable access to more services: Secure printing (initiate your print job by presenting your ConCERTO CREDENTIAL); Payment in the company canteen or at beverage vending machines; Secure webcast; or Time and attendance management.

Contact us at [concerto@scmmicro.com](mailto:concerto@scmmicro.com) for help with implementing additional applications or services.

SCM Microsystems is a leading provider of solutions for secure access, secure identity and secure exchange. For organizations and individuals that need to secure their digital assets, electronic transactions and facilities, SCM Microsystems provides solutions that cut costs and reduce risk and liabilities.

SCM Microsystems' broad and integrated offerings enable complete solutions that allow customers to turn to a single source to meet all their security and identity management challenges.

The company offers the world's broadest range of contact, contactless and mobile smart card reader and terminal technology, digital identity and transaction platforms, as well as systems that integrate physical and logical access control. SCM Microsystems' smart card-based products and solutions are utilized around the world to enable security and identification applications, transaction systems, eHealth- and eGovernment programs and physical access systems. The company also offers a range of smart card-based security, productivity and time recording solutions for small and medium-size businesses under its retail CHIPDRIVE® brand.

SCM Microsystems has more than 400 distribution partners and customers in more than 50 countries worldwide, including major PC OEM and smart card manufacturers, system integrators, banks, security application providers, government agencies, distributors, and value added resellers.

SCM Microsystems is part of Identive Group (NASDAQ: INVE; Frankfurt: INV), a leading provider of products, services and solutions for the identification, security and RFID industries.
